5. The Board nominates a President and a Secretary.
6. The Board operates with the presence of all its members and takes decisions unanimously.
7. Participation in all Board activities is mandatory for all members.
8. The Board, upon notifying the head of the selection procedure of the date and time, may hold meetings using telematic technology. At the end of the meeting the minutes must be drawn up, approved, and signed by the Secretary who has actually drawn them up. The other members of the Examining Board underwrite a statement in which they declare that they have joined the meeting and undersigned the minutes, and then forward them telematically to the competent administration office. Where applicable, reference has to be made to the University's Regulations (Rector's Decree n. 467/2016, April 18<sup>th</sup>, 2016).
9. Expenses incurred may be reimbursed in accordance with the University's Regulations pursuant to Art. 7, Paragraph 4 in reference to the recruitment of fixed-term Researchers.

### Art. 8 - Role and Duties of the Examining Board

1. In the first session the Board, having determined that in compliance with related laws, no incompatibility factors are present, outlines the preliminary assessment criteria and procedures for selection in compliance with the parameters indicated in Ministerial Decree n. 243, 25 May 2011.  
The Board also establishes an analytical system to confer points to candidates after preliminary assessment has been completed. The Board then establishes which candidates are admitted to the interview, together with the criteria for testing their English language skills, and Italian language skills for foreign applicants.
2. The Head of the selection procedure is immediately notified of the above-mentioned results which are to be published on the University's Albo Ufficiale and on the website for at least 7 days before the Board can move on to the next phase of the selection procedure.
3. The above mentioned preliminary procedure initially involves determining if the candidates possess the requisites for participation, then their CVs and publications, including their Ph.D. thesis, are assessed.
4. Following preliminary assessment, the Board will admit the most worthy candidates - 10 to 20 per cent of the original candidates – and no less than six in number - to participate in a public discussion of their qualifications and scientific work; all candidates shall be admitted to the discussion should their total number be equal to or less than six.
5. The list of candidates is drawn up by the Board and published on the University's Albo Ufficiale and on the website at least 10 days before the interview. **This is to be considered an official notification for candidates. Candidates are required to appear for their interviews on the indicated date with a valid identity document. It is important to remember that candidates are not notified individually but only through the above stated notifications published online. If the candidate does not show up, this shall be considered final renunciation to the selection procedure.**
6. Following the interviews, the Board grades the candidate's qualifications, attributes a grade to each publication and assesses interview and foreign language skills. Once this has been completed the Board draws up a ranking of the candidates and deliberates (by majority) the winner of the selection procedure.
7. All proceedings are contained in the minutes of the meetings, including all the assessment results obtained during the preliminary meeting, grading of qualifications and publications, and interview to test English language skills. The results of all of the above are published on the University's Albo Ufficiale and on the website **which to all effects represents an official notification for the participants in the selection.**

### Art. 9 - Time Limits of the Selection Procedure

1. The Board is to conclude all necessary actions within four months from the Rector's Decree nominating its members.
2. The Rector may extend the deadline only once and for no more than two months only in the case of exceptional and documented reasons brought forth by the President of the Board before the established deadline expires.

### Art. 10 - Determining Validity of Proceedings

Within thirty days after the proceedings are consigned, the Rector issues a Decree establishing their validity, which is published on the University's Albo Ufficiale and on the website. **This, to all effects, represents official notification** and from that date candidates have a period of time to file a complaint. The candidate selected shall also be notified.

<b>Project AIM</b> 1877124-3

<b>Activity n.</b> 1 Optimization of computational resources within TPS (Treatment Planning System) for Hadrontherapy.
<b>SNSI main specialization area :</b> Health
<b>Type of announcement:</b> line 1
<b>Months abroad:</b> 6
<b>ACADEMIC RECRUITMENT FIELD:</b> 01/B1 – Informatics
<b>ACADEMIC DISCIPLINE:</b> INF/01 – Informatics
<b>Place of work:</b> DISIM Department
<b>Type of commitment:</b> full time
<b>Admission requisites:</b> (line 1) A Ph.D., or an equivalent degree obtained in Italy or abroad, relating to the academic discipline of the position described and obtained not before 27/02/2014.
<b>Mobility requisites:</b> (line 1) Foreign (EU) institutions where to spend the months abroad: primarily PSI - Paul Scherrer Institut – Switzerland and/or GSI Helmholtz Darmstadt – Germany and/or University of Porto, Faculty of Engineering, Portugal and/or other highly qualified scientific institutions in which to carry out the project in line with the announcement.
<b>Research activities:</b> The aim of the project is to act within analytical TPS in calculus to be validated by means of Monte Carlo methods in order to decrease time and space resources necessary to the development of treatment plans using theoretical as well as practical tools deriving from algorithm theory and combinatory optimization and operational research theory. In particular, this decrease of the computational resources comes from both a modelling which allows the use of a specific optimization software within TPS and from the integrated or integrable use in such a software of innovative algorithms, of image analysis also, created on purpose. Supposedly, such innovative methodologies shall bring to designing “methods and apparatuses” (devices) which shall simplify the work of the business operators and decrease calculus time used by TPS within classical treatment plans planning. Moreover, being innovative tools, it may be assumed that a higher level of freedom may be given to the business operators for the development of less classical treatment plans towards a higher stereotactic direction with the aim of decreasing the delivered dose and/or of avoiding more accurately the risk organs (OAR) and, in general, of satisfying the ambitious objective functions which are not dealt with at the moment basically because they require excessive computational resources. In detail, the aim is to initially approach the dose optimization in the case of PB-IMPT protonic treatments. In this context, the aim is to make a mouse modelling by means of image fusion and registration techniques first to create dedicated interfaces and then getting into the optimization of the computational resources of TPS kernel. The assessment of the resulting plans within the TPS kernel shall be made also by means of Monte Carlo validation by the partner institutions. At the same time the research shall carry on to the algorithmic integration of existing and efficient softwares, to the creation and testing of innovative algorithms and to the continuous updating/improving of models (within the combinatorial optimization) to be used in practice.
